MATRIX NEXUS
COMPANY LTD

INDUSTRIAL SERVICES PROFILE

SCAFFOLDING / BLASTING / PAINTING

# Scaffolding. Blasting. Protective painting.

Scaffolding erection and rental, abrasive blasting, protective painting and contracting enquiries.

**DAMMAM | EASTERN PROVINCE | SAUDI ARABIA**

Updated 1 November 2026

Stock photography: Turei Pinga and Mat Sheard / Pexels. Other imagery supplied for application review; pictured work is not claimed as a MATRIX project.

INDUSTRIAL SCOPE

# Three trades. One clear enquiry.

Start with the work you need to complete. We will define the access, surface preparation, painting and contracting requirements with you.

01

## Scaffolding & access

Erection, scaffold and work-platform rental, alterations and dismantling support.

02

## Blasting & preparation

Abrasive blasting and surface-preparation enquiries for steelwork, pipework and structures.

03

## Protective painting

Painting application and coating-related work against an agreed project specification.

### CONTRACTING & RENOVATION

Building construction and renovation enquiries can be coordinated alongside the industrial work package.

SCAFFOLDING & ACCESS

# Scaffolding built around the task.

Industrial access for construction, maintenance and work at height - planned around the working area, loads, duration and site requirements.

### Erection & access

Site-specific scaffold arrangements, working platforms and agreed access routes.

### Rental & materials

Scaffold and work-platform rental to agreed quantities, duration and logistics.

### Alterations & dismantling

Planned changes and close-out aligned with the work sequence.

PREPARE THE SURFACE

# Blasting & surface preparation.

Surface preparation for pipework, steelwork and structures, aligned with the specified coating system.

01

## Define the surface

Substrate, condition, existing coating, area and work location.

02

## Agree the preparation

Client specification, required preparation and access or containment needs.

03

## Coordinate the work

Programme, site interfaces, inspection needs and handover expectations.

PAINTING & COATING

# Protective painting. A clear finish.

From the prepared substrate to the specified coating system, define the application and inspection requirements before work begins.

### Specified system

Share the coating specification, application area and required finish.

### Practical application

Confirm work location, access, sequence and the site conditions.

### Handover requirements

Agree the records and inspection checkpoints required by the client.

SUPPORT AROUND THE PROJECT

# Rental and contracting that fit the scope.

Scaffold rental, building construction and renovation, coordinated around your project requirements.

### Scaffold & platform rental

Quantities, hire period, delivery, collection and access arrangement.

### Building construction

Residential, non-residential and government-building enquiries.

### Renovation

Remodelling and renovation requirements for existing buildings.

## USEFUL INFORMATION FOR A QUOTATION

Location and working area
Scope, dimensions and drawings / BOQ
Required start date and programme
Site restrictions and client specifications

HOW WE WORK

# From first enquiry to planned delivery.

A practical sequence that applies across access, preparation, painting and contracting requirements.

## 01 Receive the requirement

Share the location, scope, drawings, specification and expected programme.

## 02 Review the work package

Clarify access, surfaces, materials, working conditions and client interfaces.

## 03 Prepare the proposal

Set out the agreed scope, assumptions, commercial terms and planned sequence.

## 04 Coordinate and close

Align site execution, inspection needs, handover and any material return.

# Tell us about your industrial requirement.

Scaffolding, blasting, protective painting or contracting: send the scope, location, programme and any drawings or specification.
